4. REVISED ESTIMATES (R.E.) 2024-25

- I. The R.E. 2024-25 is to be prepared, as realistically as possible, & with reference to the following principles, instead of repeating the previous year's budget figures in a routine way.
 - a. progress of expenditure during first (9) nine months of current financial year;
 - b. expenditure likely to be incurred during the remaining months;
 - c. additional funds proposed to be obtained as supplementary grants;
 - d. re-appropriation or resumption of funds already made or proposed;
 - e. new head of account sanctioned during the current financial year for booking expenditure on new schemes; accommodating any adjustments; opened while distributing the existing lump sum provisions; &
 - f. any other factor having material effect on expenditure during current financial year.
- II. In short, the revised estimates should represent the anticipated final expenditure of the current year, with reference to all relevant post-budget developments, and should closely correspond to the actual expenditure.
- III. As the closing balance of the year is calculated with reference to the revised estimates, any significant variation between the revised estimates and the actual expenditure would

upset the Ways and Means forecasts. Therefore, this exercise should be meticulously done.

- IV. The R.E. 2024-25 in the aggregate, should not normally exceed the Budget Estimates 2024-25.

5. BUDGET ESTIMATES 2025-26

- I. All HoDs and Estimating Officers should personally ensure that estimates are prepared with utmost care, taking into account all aspects that are normally available at the time of estimation, so as to avoid huge variations between the estimates & actuals.
- II. The variations between R.E. for 2024-25 and B.E. for 2025-26 should be clearly & precisely explained in the remarks column, otherwise, any proposed increase will not be considered.
- III. The following factors should be considered, while preparing the B.E. 2025-26
 - a. requirements to be assessed with reference to all the available data;
 - b. key consideration should be Actuals of previous year & R.E. of current year.
 - c. amount proposed for each program/scheme/function/etc. to be calculated as accurately as possible, to avoid both excessive & inadequate provisioning.
 - d. corresponding reduction to be made, if the current year estimates provide for non-recurring items of expenditure.

6. ESTIMATES for RECEIPTS:

I. Tax Revenue

- a. The assumptions of Tax Revenue Receipts are to be based on current rates of taxation, duties imposed, and fees levied under relevant Acts.
- b. While revising the estimates for the current year over the assumptions envisaged earlier, the Estimating Officers should account for the relevant factors such as target fixed, progress of actuals & anticipated additional yield from measures of enhancement of existing taxes, the estimated loss of revenue account of abolition or reduction of taxes.
- c. The Budget Estimates for the next F.Y. should not be merely a repetition of the R.E. for the current year but should account for all relevant factors viz. arrears to be collected, assumption of a reasonable higher growth rate in respect of tax revenue & previous year's performance.
- d. HoDs to also indicate the measures proposed to augment resources.

II. Non Tax Revenue

- a. The Non Tax revenue as a percentage of revenue receipts is declining over past several years. The major reason for the stagnation is lack of regular & periodic monitoring by the administrative departments and the non-revision of charges periodically.

The schemes with similar objectives should be clubbed together to avoid overlapping. No new State scheme be formulated if similar objectives are covered under any Centrally Sponsored Scheme.

17. Improper budgeting: In preparation of previous budgets, the following is noticed.

- a. In certain cases, supplementary Demands of Grants were obtained for certain schemes, but the final expenditure incurred was less than the Budget Estimates.
